ABSTRACT

Tuition and fee information for resident and non-resident students in public colleges and universities in the 50 states is presented in tabular form for 1972-73 and 1977-78. In addition to tables, charts are provided that graphically illustrate the relative position of Washington State averages. Results of the National Association of State Universities and Land Grant Colleges (NASULGC) survey are presented in the first two tables and charts and show that in the 49 states other than Washington, resident undergraduate tuition and fees increased 5.3 percent in 1977-78 and 31.1 percent in the last five years and nonresident undergraduate tuition and fees increased 6.2 percent in 1977-78, with a five-year increase of 34.4 percent. Washington experienced its first increase since 1972-73 last year and showed an increase of 17 percent for resident tuition and fees and a 51.4 percent increase for nonresident tuition and fees. Results of the American Association of State Colleges and Universities (AASCU) survey presented in the remaining tables and charts show that resident undergraduate tuition and fees increased an average of 6.4 percent in 1977-78 for the 45 states surveyed, with a five-year increase of 29.5 percent, nonresident tuition and fees increased 7.8 percent in 1977-78, with a five-year increase of 28.6 percent. Tuition and fees at Washington institutions for residents increased 16.6 percent in 1977-78 with a five-year total increase of 19.4 percent. In 1977-78 resident tuition and fees increased 45.9 percent, the first increase since 1972-73. (SPG)

Since 1970, the Council for Postsecondary Education has compiled tuition and fee information on public colleges and universities. The source of this information has been reports of the National Association of State Universities and Land Grant Colleges (NASULGC) and the American Association of State Colleges and Universities (AASCU) beginning in 1968-69. Insofar as possible, compilations have been consistent since that time and have dealt with the "university of" each state (from the NASULGC survey) and the state averages of those public colleges and state universities reported in 1968-69 and 1969-70 in the AASCU survey. Data on the AASCU institutions are not intended to represent the average of all public institutions of a state, but are meant to display consistent averages and the changes over time, of the same set of institutions.

As with any survey of this magnitude, definitional interpretations may result in some non-comparable responses. The staff has attempted to correct such errors through telephone follow-up with institutions reporting information which was questionable or varied substantially from previous reports.

The data presented in the following tables represent the most accurate information available through the many sources the Council staff has contacted. Corrections to historical data are very difficult to obtain, but in a few instances more accurate data have been available and have been included in these tables.

7

In addition to the tables, charts have been provided which graphically illustrate the relative position of Washington averages. As displayed on these charts, Washington, with the 1977-78 rate increases, still ranks below the seven comparison state and national averages in resident tuition and fee charges, however, Washington's relative position in non-resident charges has increased substantially. As has been pointed out in the Council's report on Fall, 1977 enrollments, these increases do not appear to have had any significant negative impact on non-resident fee-paying enrollment.

No consistent national reports on community college tuition and fees are currently available. The Education Commission of the States plans to collect this information in the near future from each state. As soon as those results are available, they will be provided as an addendum to this report.

Universities

Table IA and Chart IA

Average resident undergraduate tuition and fees increased 5.3% last year in the 49 states other than Washington, resulting in a 31.1% increase in the last five years. The increase for institutions in the seven comparison states was 9.6%, with the five year increase reported as 30.0%. Washington institutions experienced a 17.0% increase in 1977-78. This was the first increase since 1972-73, thus the 5 year total increase is also 17.0%.

In reviewing the 49 state average increase of 5.3%, a total of 28 states (including six of the seven comparison states) reported an increase of more than \$10.00, an amount which may be reflective of adjusted student activities fees. The average increase of these 28 states was 10.0% with a range of 1.3% to 29.6%.

Table IB and Chart IB

Reported increases in nonresident undergraduate tuition and fees were slightly higher than resident increases. The 49 state average increase was 6.2% for 1977-78, with a five year increase of 34.4%. In the seven comparison states, the most recent increase was 10.1%, with a 38.3% increase over five years. Washington, experiencing its first increase since 1972-73, shows a 51.4% increase for both the most recent year and the five year composite.

Thirty-one of the 49 states (including all of the seven comparison states) increased nonresident tuition and fees in amounts greater than \$10.00. The average increase was 10.2% with a range of 1.0% to 30.2%.

** Estimated 1978-79 average based on linear regression with a 95% confidence limit

Public Colleges and Universities

Table IIA and Chart IIA

Resident undergraduate tuition and fees increased an average of 6.4% for the 45 states included in the survey resulting in a 29.5% increase in the last five years. The average of the seven comparison states increased 7.9% in the most recent year and 32.4% over the last five years. Tuition and fees at Washington institutions increased 16.6% in 1977-78 with a five year total increase of 19.4%.

Thirty-two of the 45 states (including six of the seven comparison states) experienced increased averages ranging from 1.6% to 32.6% with an average increase of 10.0%.

Table IIB and Chart IIB

The average increase for the 45 states in the nonresident category was 7.8% in 1977-78, with a five year increase of 28.6%. The average average increase of the seven comparison states was 11.8% with a five year average increase of 38.0%. In 1977-78, Washington institutions increased tuition and fees by 45.9%. Since this was the first increase since 1972-73, the five year increase is also 45.9%.

Thirty-three of the 45 states (including all of the seven comparison states) experienced increases beyond what could reasonably be attributed to adjusted student activity fees. The average increase of these states was 10.3% with a range of 1.0% and 27.5%.
